

# RV SNAP TRAP™

Revolutionize your RV experience with the RV Snap Trap™, the industry's first and only "Snap-On" P-Trap for RV sewer hoses. This innovative solution transforms any standard 3" RV sewer hose\* into a highly effective barrier against sewer gas and pesky sewer flies. Designed for convenience, versatility, and peace of mind, the RV Snap Trap™ is a must-have for hassle-free campsite living and extended gray tank valve usage.

SP54-267

## RV Snap Trap Features

- **First-of-its-Kind Innovation:** The RV Snap Trap is the industry's only "snap-on" RV sewer hose P-trap solution.
  - **Complete Protection:** Provides a 100% barrier against sewer gases and sewer flies throughout the RV plumbing system.
  - **Extended Usage Support:**
    - Safely set gray tank valves to the open position for prolonged periods, enabling worry-free use of showers, sinks, washing machines, and other water appliances.
    - Prevents overfilling of gray wastewater holding tanks.
  - **Adjustable Design:** Includes adjustable legs with three height settings (tall, mid, or low) or the option to remove legs entirely for customized installation.
  - **User-Friendly:** Effortless to use during campsite setup and tear-down.
  - **Travel-Friendly:** Compact and easy to store while on the go.
  - **Simple Assembly:** Intuitive and easy to operate.
  - **Perfect Pairing:** Designed to seamlessly complement the RV Residential Flush™ system.
  - **Versatile Installation:** Can be installed at the beginning, middle, or end of the sewer hose run.
- *Not compatible with lippert waste master hose, as its diameter exceeds 3".*

RV Residential Flush™

# BLACK TANK BYPASS VALVE KIT

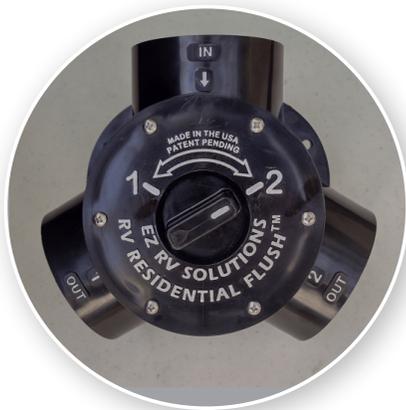

## The Industry's First and Only RV Black Tank Bypass Solution

The Original RV Residential Flush™ Black Tank Bypass Valve Kit (3" diameter) revolutionizes RV plumbing by letting you easily switch between Black Tank and Residential Flush modes. Whether you're upgrading your RV toilet or looking to simplify maintenance, this innovative solution offers unmatched convenience and flexibility. Designed for compatibility with hand-reach, remote manual, or motorized drive kits (motorized coming soon), the kit provides everything you need for effortless operation.

— Must be installed by a licensed plumber or certified RV technician. Remote Actuation Drive Kits Sold Separately. —

## RV Black Tank Bypass Valve Kit Features

**Enhanced Comfort:** Enjoy residential-style toilet function with RV or residential-style toilets.

**Freedom of Choice:** Use your preferred toilet paper and switch to the black tank only as needed.

**Water Efficiency:** Save 30–100 gallons per cleaning by reducing black tank flushes.

**Improved Hygiene:** Block sewer gas and flies with the RV Snap Trap and a sewer connection.

**System Longevity:** Extend your RV black tank's lifespan and minimize chemical use.
